About This Content

Soviet Sneaking Suit worn by Naked Snake during Operation Snake Eater.
In addition to the noise-dampening soles that eliminate the sound of footsteps, this suit features a high-strength aramid weave that offers superb damage resistance.
*In FOB missions, this uniform prevents your body heat being detected by NVG-equipped enemies.
* Usable by Snake or male DD Soldiers. (Not usable in MGO)
* You must proceed to a certain point in the story and meet the proper development requirements before this item can be developed.

DirectX: Version 11

Storage: 28 GB available space

Sound Card: DirectX 9.0c compatible sound card

English,French,Italian,German,Japanese,Russian

No open sessions and when you try to create your own it doesn't work in short you can't even play the game. If you played the old flash game, this is basically exactly what you say except with a thick layer of atmosphere on top. If you didn't play the old flash game: This is a relatively good puzzle game whose central mechanic sounds simple but lends itself to good brainteasers. It does occasionally take a break from actual puzzles to give you a linear "story"\atmosphere segment (not that there's much story).. Fun combat and progression, 40k atmosphere done really well and a great story so far. Cant wait for expansion!. Not worth it!. A very staright forward and awsome software. It will guide you everystep of the way and help you achieve your very first game build. It will be a basic build but you will know how to work with this software and realize just waht you can accomplish with RTS Creator.. i'll be back in 5 years.. I first met Fritz many years ago when it was the talking chess program and was mentioned together with Kasparov in New in Chess - Yes he was actually playing back then.

User interface is a bit nicer but really no major improvements. Included multimedia is aimed at beginners. Some more games commented by a stong player would be nice (remember the Karpov comments with (I think) chessmaster 3000?). The engine is still terribly strong for a measely human like me.

It's still just Fritz - a strong program with nice database options - both for reference and for storing your own games.

Is it a good buy? Well if you just want a chess program and a database then you should probably look at free options on the internet. But if you want to play at Playchess.com and use their material then it looks like a good deal because of the 6 months included membership. Should you consider upgrading with the DLC for 'Deep Fritz'? - well are you a superstrong chess player? I'm not so I wont. In fact I'm very happy with the chance to get Fritz+playchess for a good price and I dont miss 'Deep multicore etc.' options.

For reference I'm a "hobby" player with an Elo rating around 1900.. What a stupid game.

And I love it. I just can't say how much I love it.

It's dumb. REALLY dumb.

But I couldn't stop laughing as I played it!

But it's kinda dumb... :). sound is too loud.
no change resolution or run in window.
no tutorial.
glitches - she stuck in "sane" mode and unable to operate object.
. Fun but hard to find more than 2 players online to play with. Fun but dead, a shame.

Played for >180 minutes.

There are 2 (two) listed 'perspective characters'
And yet about 80% of interactions are with or about this 'Ben' dude.

What the heck? Who is this game about? What is this game about? I don't know, and I don't think devs know.

Not recommended.. A PC port for a mobile game that was not very good to begin with.

Straight away what will be noticed is the "selection" screen there is no written information only what looks like someyjing made using MS paint with pictures stuck on of the different "droids"? I guess with abilities that are not explained instead they require you to either guess or play each and every single picture ability until you actually find the decent one.
There are only 2 buttons need on a keyboard for this which as said by ithers is Z and X. X uses the projectiles which you shoot at things. Z is like a jetpack that just goes up. The game automatically moves forward. Honestly if it was a flash game on a browser then it would be fine but to pay on steam is a disgrace and leaves me wondering how something like it could even dream of getting past greenlight.
Honestly though as I mentioned if it was a free flash game on browser it would be O.K. not great but not bad. BUT ON STEAM? FOR MONEY? NO. Super Duper Party Pooper is a rhythm game about poo, basically you have to time your key presses just right to earn poop and points. You are then able to poop that poop onto the faces of your background dancers.. hey go check out my fire♥♥♥♥♥soundcloud you won't regret it!! @StagDragger. good game. A basic picross game. You can't go wrong for the price really.. This little visual novel, 'Banyu Lintar Angin', warmed my heart. You don't need diologue to understand the illustrations and I prefer the simplicity.

The illustrations of the three siblings are very adorable as you see their memories living together. Even though it's short, I really enjoyed this visual novel. The music and how well-put together the illustrations were, is amazing. I reccommend checking out this special jem!. A short, somber third-person walking simulator with themes of childhood trauma. You already know if you're the kind of person this will appeal to...
